Assessment of germicidal properties of CINTROPUR 4100 UV-systems

For a transmittance at 254 nm higher than 90 % of water, the CINTROPUR 4100 UV system deliver:

a fluence higher than 250 J/m² at a water flow rate comprised between 0 et 2.10 m³/h.

a fluence higher than 400 J/m² at a water flow rate comprised between 0 et 1.31 m³/h.
